## MEGA-IP GENERAL FEATURES

MEGA-IP is an innovative and extremely versatile system with high processing power, which introduces new standards to hotel management and domotics in general. Born from two decades of experience in the “building automation” sector, it uses the most up-to-date technologies currently available on the market. Control units connected to the Ethernet and TCP/IP protocol make the system simple to install and allows existing infrastructures to be used, thus preventing the need for new BUS connections.

Modularity and configurability, along with new monitoring and control devices, hugely broadening the fields of application for the MEGA-IP compared to previous systems: hotels, residences, villas, offices are just some of the places where it can be used. Specific modules for the management of air conditioning, lighting, electric shutters, etc., so that installations can be adapted to specific needs, ensuring maximum energy saving and guests comfort.

The use of glass touch panels introduces a touch of design and originality to the system, giving it greater functionality and reducing mechanical wear and possibilities of breakdown.

## SYSTEM STRUCTURE AND MAIN FUNCTIONS

MEGA-IP is an on-line system which uses small peripheral units with their own intelligence and the possibility to save data, for installation in the room's electrical panel. The units are connected to a monitoring PC via Ethernet or traditional half-duplex RS485 bus. Various types of control panels and peripherals can be connected to them via local RS485 bus, enabling management of the following functions:

- Access to rooms and shared spaces using a 13.56MHz Mifare card.
- Activation of electricity and management of each single light source in a room, with possibility to regulate intensity and select specific lighting scenarios.
- Air conditioning in guest rooms, bathroom and shared spaces based on daily thermal profiles linked to bookings and occupancy, with the aim of achieving maximum energy savings without reducing guests' comfort.
- Control of electric shutters.
- Detection of bathroom alarms, overflow or break-ins.
- Monitoring of room status (free, occupied, to be cleaned).
- Facilities (housekeeping request, mini-bar status, room service, do not disturb, etc.).
- Supervision of technological installations (alarm detection and anomalies signalling, remote activation of lights and electrical equipment, monitoring of thermal plant, etc.).

The self-diagnostic function can detect and signal any malfunction in a peripheral unit, module or control panel, further increasing the system's level of safety and reliability.

The archive stores all data relating to accesses, alarms and anomalies. Specific searches, printing and exporting of results, making it a fundamental tool for managing the unit on which the system is installed.

Additional client monitoring computers may be networked with the main computer making the system suitable for installation in hotels of all sizes.

The interface to the most common air conditioning and front-office systems (PMS) meets the needs of modern reception facilities, ensuring efficiency and speed, making the system open and extremely powerful. Further and new types of interface can be implemented on request.

MEGA-IP is, without a doubt, a blend of design and technology which aims to increase guest safety and comfort, while ensuring high energy savings. Ease of use, efficiency and reliability make it an invaluable companion in the management of hotels and reception facilities where it is installed.

## ROOM CONTROL UNIT

UGC-IP

Cod. 6700-101010

NEW

The room control unit is housed in a 5-module box for DIN rail. It has the following inputs:

- balanced input (with line integrity control) connecting the bathroom pull cord and overflow sensor (with volt-free contact);
- analog input configurable for connection to one of the following devices: volumetric anti-break-in sensor, simple overflow sensor, alarm contact, Do Not Disturb button, Courtesy Light button, Housekeeping button, Room Service button, Open Door from Bedhead button, Reset Facilities button (alarm, cleaning, mini-bar and room service), timed button, switch, guest/staff presence contact;
- 3 digital inputs configurable for connection to the following devices: room window switch, bathroom window switch, door switch, mini-bar switch, volumetric anti-break-in sensor, simple overflow sensor, alarm contact, Do Not Disturb button, Courtesy Light button, Housekeeping button, Room Service button, Open Door from Bedhead button, Reset Facilities button (alarm, cleaning, mini-bar and room service), button, timed button, switch, guest/staff presence contact. Features the following relay outputs with volt-free contacts for 230Vac 4(2)A loads:
  - courtesy light;
  - room electricity contactor;
  - configurable AUX output managing one of the following functions: bell, water valve, balcony light, electric shutters (opening or closing), ON/OFF thermostat, activation via button, activation via timed button, activation via switch.

There are also two 12Vdc outputs for indicator lights: "Do Not Disturb", "Housekeeping" or "Room Service" and one 12Vdc, max 1.2A output for the door lock.

An RJ45 plug connects the unit to the Ethernet to exchange data with the monitoring computer via TCP/IP protocol. Alternatively it is possible to connect to the traditional RS 485 bus via 2-pin connector. There is also a dual RJ12 connector to connect to expansion units and control panels.

Addressing via 12-way dip-switch, reprogrammable microcontroller via bus or network, non-volatile memory for archiving events even when there is no connection to the monitoring computer.

12Vdc, 3.5A power supply. Dimensions 88x100x62 mm. Weight 0.3 Kg.

## TECHNOLOGICAL CONTROL UNIT

UGT-IP

Cod. 6700-107010

NEW

The technological control unit is housed in a 5-module box for DIN rail. It has three analog and one digital configurable inputs which can be connected to the following devices:

- temperature sensors for common areas (analog inputs only);
- alarm or anomaly contacts;
- switches;
- buttons;
- bathroom emergency pull cords;
- overflow sensors;
- energy meters.

It also has four relay outputs with voltage-free contacts for 230Vac, 4(2)A loads for managing devices connected to the relative inputs (thermostats, alarm repetition, etc.), for monitoring access (opening contact) and ON/OFF or timed activation via computer. An RJ45 connector connects the unit to the Ethernet to exchange data with the monitoring computer via TCP/IP protocol. Alternatively it is possible to connect to the traditional RS 485 bus via 2-pin connector. Dual RJ12 connector for connecting expansion units and control panels. Addressing via 12-way dip-switch, reprogrammable microcontroller via bus or network, non-volatile memory for archiving events (alarms, access, etc.) even when there is no connection to the monitoring computer. 12Vdc, 3.5A power supply. Dimensions 88x100x62 mm. Weight 0.3 Kg.

## FANCOIL CONTROL UNIT

UGF-IP

Cod. 6700-103010

NEW

The fan-coil control unit is housed in a 4-module box for DIN rail. Features the following inputs:

- configurable input for bathroom or room window switch, button, timed button, switch;
- input for bathroom or room temperature sensor
- features the following relay outputs with voltage-free contacts for 230Vac, 4(2)A loads:
  - Low-speed fan-coil relay;
  - Medium-speed fan-coil relay. Alternatively, ON/OFF or timed activation via computer, shutter opening or shutter closing;
  - High-speed fan-coil relay. Alternatively, ON/OFF or timed activation via computer, shutter opening or shutter closing;
  - hot/cold water solenoid valve relay for 2-tube fan-coil or hot water solenoid valve for 4-tube fan-coil. Alternatively, ON/OFF or timed activation via computer, shutter opening or shutter closing;
  - heated towel rail or cold water solenoid valve relay for 4-tube fan coil. Alternatively, slaved activation, timed slaved activation, shutter opening, shutter closing, activation via button, timed button or switch.

Also features a 0-10Vdc output for controlling radiator modulating valve or fan-coil. Connection to UGC-IP or UGT-IP control unit and other units or panels via RJ12 connectors. 12Vdc power supply directly from UGC-IP or UGT-IP units via RJ12 connector or specific 12Vdc, 3.5A power supply unit. Dimensions 70x100x62 mm. Weight 0.2 Kg.

# PROXIMITY CARD READER

LTC-T

NEW

Cod. 6700-113000

13.56MHz Mifare proximity card reader, with capacitive glass touch panel. Enables differentiated access to room for guests, staff, managers, maintenance operators, etc. Features "bell" button and icons signally "guest in room", "do not disturb", "check mini-bar" and "room to be cleaned". Also signals "valid card", "invalid card" and "alarm in progress". Housed in 3 modules flush mounting box. Connection to UGC-IP unit and other units or panels via RJ12 connector for transmission of data and for 12Vdc power supply. Dimensions 127x95x9mm (+44mm internal). Weight 0.2 Kg.

# PROXIMITY CARD READER FOR COMMON AREAS

LTZ-T

NEW

Cod. 6700-117000

13.56MHz Mifare proximity card reader, with capacitive glass touch panel. Allows differentiated access to shared spaces for guests, staff, managers, maintenance operators, etc. Features "bell" button and relay output with volt-free contact for electronic ringtone or opening contact (max. 24V, 4(2)A). Housed in 3 modules flush mounting box. Connection to UGT-IP unit and other units or panels via RJ12 connector for transmission of data and for 12Vdc power supply. Dimensions 127x95x9mm (+44mm internal). Weight 0.2 Kg.

## SMART ROOM ACTIVATOR

AIT-T

NEW

Cod. 6700-125000

Detects the presence within room of guest or staff via proximity card in slot and activates the room's facilities only if the card has been enabled. Capacitive glass touch panel with illuminated slot for card. Features buttons for "room service", "do not disturb" and "housekeeping". Housed in 3 modules flush mounting box. Connection to UGC-IP unit and further units or panels via RJ12 connector for transmission of data and for 12Vdc power supply. Dimensions 127x95x9mm (+44mm internal). Weight 0.2 Kg.

## TEMPERATURE CONTROL PANEL

PTF-T

NEW

Cod. 6700-133000

Capacitive glass touch panel for managing air conditioning, with integrated temperature sensor. Allows the guest to change temperature, speed, automatic or manual functioning mode and to shut down the air conditioning system. The display shows the set temperature, the actual temperature, speed, functioning mode, windows status and alarm messages (help request, overflow, break-in). The panel allows staff to reset alarms locally and set "room cleaned" and "mini-bar replenished" messages. Housed in 3 modules flush mounting box. Connected to UGC-IP, UGT-IP and UGF units via RJ12 connector for transmission of data and for 12Vdc power supply. Alternatively may be supplied directly via specific 12Vdc, 3.5A power supply unit. Dimensions 127x95x9mm (+44mm internal). Weight 0.2 Kg.

## ELECTRIC SHUTTERS CONTROL PANEL

PCT-T

NEW

Cod. 6700-162000

Capacitive glass touch panel to control electric shutters. Features two backlit touch buttons for opening and closing electric shutters. Housed in 3 modules flush mounting box. Connection to UGC-IP and UGT-IP unit or other units or panels via RJ12 connector for transmission of data and for 12Vdc power supply. Dimensions 127x95x9mm. (+44mm internal). Weight 0.2 Kg.

## LIGHTS CONTROL UNIT

UGL-IP

NEW

Cod. 6700-105010

The lights control unit is housed in a 4-module box for DIN rail and allows ON/OFF and regulation of intensity and colour of 9 different light points. Features 6x0-10Vdc outputs for controlling electronic dimmers and two relays for 230Vac, max 4(2)A loads. It is also provided with DALI and DMX outputs to control white and coloured lights. Activation of light sources may be via capacitive glass touch panel or traditional buttons connected to the four inputs available on the unit. Connection to UGC-IP or UGT-IP control unit and further expansion units and panels via RJ12 connectors. 12Vdc power supply directly from UGC-IP or UGT-IP units via RJ12 connector or specific 12Vdc, 3.5A power supply unit. Dimensions 70x100x62 mm. Weight 0.2 Kg.

8-COMMANDS LIGHTS CONTROL PANEL

PCL8-T

NEW

Cod. 6700-158000

Capacitive glass touch panel to control lights. Features 6 buttons for ON/OFF and regulating intensity of 6 light sources, one button to select lighting scenarios and a general OFF button for lighting. Housed in 3 modules flush mounting box. Connection to UGL, UGC-IP, UGT-IP unit and further units or panels via RJ12 connector for transmission of data and for 12Vdc power supply. Dimensions 127x95x9mm (+44mm internal). Weight 0.2 Kg.

## 2IN-20UT EXPANSION UNIT

UE2-IP

NEW

Cod. 6700-109020

The 2IN-20UT expansion unit is housed in a 3-module box for DIN rail. It has two configurable analog inputs which, when combined with the UGC-IP room control unit, can be connected to the following devices:

- bathroom temperature sensor;
- room temperature sensor;
- bathroom window switch;
- room window switch;
- open shutters button
- close shutters button.

If used with the UGT-IP technological control unit, may be connected to:

- temperature sensors for common areas;
- alarm or anomaly contacts;
- switches;
- buttons;
- bathroom emergency pull cords;
- overflow sensors;
- energy meters.

It also has four relay outputs with voltage-free contacts for 230Vac, 4(2)A loads for managing devices connected to the relative inputs (thermostats, shutters, etc.). and ON/OFF or timed activation via computer. Connection to UGC-IP or UGT-IP control unit and other expansion and monitoring units via RJ12 connectors also with necessary 12Vdc power supply. Dimensions 52x100x62 mm. Weight 0.1 Kg.

## 4IN-40UT EXPANSION UNIT

UE4-IP

NEW

Cod. 6700-109040

The 4IN-40UT expansion unit is housed in a 4-module box for DIN rail. It has four configurable analog inputs which can be connected to the following devices:

- temperature sensors for common areas;
- alarm or anomaly contacts;
- switches;
- buttons;
- bathroom emergency pull cords;
- overflow sensors;
- energy meters.

It also has four relay outputs with voltage-free contacts for 230Vac, 4(2)A loads for managing devices connected to the relative inputs (thermostats, etc.) and ON/OFF or timed activation via computer. Connection to the UGT-IP control unit and other expansion and monitoring units via RJ12 connectors also with necessary 12Vdc power supply. Alternatively may be supplied directly by specific 12Vdc, 3.5A power supply unit, Dimensions 70x100x62 mm. Weight 0.2 Kg.

## PROXIMITY CARD

### STM

13.56MHz Mifare proximity card, 1K memory, credit card format, standard printing. Dimensions: 54x85x0.8 mm. Weight 0.01 Kg.

Cod. 6700-235010

## MONITORING AND CONTROL SOFTWARE

Power and ease of use are the main characteristics of this software with a clean and intuitive graphic interface which, with a few clicks, allows you to reach every section dedicated to monitoring the system's fundamental features: bookings, access control, temperature control, room status, staff management, technological functions, etc. Particular attention has been paid to the security section (such as the signalling of alarms and anomalies, self-diagnostics, consultation and printing of historical archive, etc.), with automatic backup option for all parameters and system recovery in the event of computer damage. Designed for small and large installations, it can handle additional monitoring workstations and interface modules with front-office systems, air conditioning systems, fire detection systems, etc.

### SWB-IP

## MEGA-IP WIRING DIAGRAM

## MEGA GENERAL FEATURES

MEGA is a distributed intelligence system for automatic management and control of room automation functions in hotel facilities of any size, residential hotels, office buildings, etc. in order to improve comfort for guests and save on heating and electricity costs. The control units installed in the rooms communicate with the PC-based central supervision station over a BUS. They are provided with independent intelligence to manage the controlled processes also without communication with the central station. The user-friendly application installed in the PC controls the following functions:

- Air conditioning/heating of rooms, bathrooms and common areas.
- Safety: the system detects bathroom and flood alarms. Intrusions are detected by controlling the status of doors and windows or by means of volumetric motion sensors. When the room is empty the lights and sockets are deactivated.
- Access control to rooms and common areas by guests and staff by means of chip card or transponder readers, with access record function.
- Room status: free, in use, to clean.
- Energy saving: the activation of air conditioning/heating and electricity in rooms depends on the presence of guests.
- Administration: the system can be interfaced with some of the most popular front-office PMS applications.
- Self-diagnostics: system anomalies are detected.
- Supervision of technological installations: you can activate lights of external and/or common areas, pumps and actuators.

The software can be customised for the specific installation. The structure of the system, which is based on “distributed intelligence” concept, provides for two levels:

- First level, composed of a dedicated PC with the management software.
- Second level, composed of modular units with microprocessor (MEGA and MEGA-TECH control units) connected in network and to the PC with UTP CAT.5 bus cable (1x2 unshielded). The control units are installed in the room electrical panels and manage the assigned area (room) independently. By communication with the control units, the PC supervises and coordinates the entire system automatically and detects malfunctioning, faults and alarms.

The PC must be always on.

In case of PC anomalies the main functions of the system are guaranteed.

## ROOM CONTROL UNIT

UGC

Cod. 6100-101010

The "MEGA" control unit is housed in 9-module box for DIN rail. It is provided with analog and digital inputs for connection of the following devices:

- chip card or proximity card reader
- door-bell push button
- room activation panel
- bathroom temperature sensor
- room temperature sensor
- room temperature panel
- door open contact
- window open contact
- mini bar open contact
- bathroom pull cord for help call
- flood sensor
- volumetric motion sensor against intrusion
- "do not disturb" push button
- courtesy light push button
- door open push button from bed headboard

It is provided with relay outputs with voltage free contacts for 230Vac – 4(2)A loads to control:

- courtesy light
- room electricity contactor
- ON/OFF towel warmer electrovalve
- 3-speed fan-coil fan
- either ON/OFF fan-coil electrovalve or ON/OFF, modulating motorized or modulating linear radiator electrovalve (controlled with 0-10Vdc continuous voltage)
- AUX output to close electric shutters or water electrovalve in case of flood, switch-on balcony light or activate bell.

The control unit is also provided with 5 SCR outputs for out-of-door signalling (guest in room, do not disturb, room to clean, minibar to check, help call/flood) and one 12Vdc output, max. 1.2A for electric door lock. Data transmission over UTP CAT.5 bus cable with two wires, RS 485 standard. Flash-type reprogrammable microcontroller. 12Vac, 30VA power supply. Dimensions: 160x100x60mm. Weight: 0.50 kg.

**CHIP CARD READER WITH SYNOPTIC**

LCC

Cod. 6100-111000

It provides access to the room in different mode for guests, managers, staff and maintenance operators. It is provided with illuminated insertion slot for chip cards with ISO 7816 format and 2 leds for card validity. It is also provided with 5 light signals to display: "guest in room", "do not disturb", "room to clean", "mini-bar to check", "help call/flood". It is housed in 3-module box and connected to room activator with 6-wire cable terminated with RJ12 PLUG. Weight: 0.1 kg. Depth 50mm.

## ROOM ACTIVATOR WITH JACK SOCKET

AJ

Cod. 6100-127000

It detects the presence of guests or staff in the room and activates relevant services. Light for easier insertion of jack. It is housed in 1-module box. It is connected to the control unit Mega with 6-wire cable terminated with RJ12 PLUG. If the "PTF/PTR" panel is not installed, the button can be used by the staff to set the "room clean" and "full mini-bar" status. In this case a second 6-wire cable terminated with RJ12 PLUG must be used for connection to the MEGA control unit. Weight: 0.04 kg. Depth 40mm.

## FAN-COIL THERMOSTAT PANEL

PTF

Cod. 6100-133000

It allows the guest to change temperature, speed, automatic or manual operation and switch off air conditioning. The display shows time, set and measured temperature values, speed, window status, and help call. The light sensor optimises contrast and luminous symbols provide information on operation status. The panel allows the staff to reset bathroom and flood alarms and set the "clean room" and "full mini-bar" conditions. It is housed in 3-module box and connected to the control unit with 6-wire cable terminated with RJ12 PLUG. Weight: 0.1 kg. Depth 45mm.

## SUPERVISION AND CONTROL SOFTWARE

SWB

Cod. 6600-300010

Extremely easy to use, with modern user-friendly graphics, it allows for complete management of rooms and common areas in terms of accesses, temperature, electric utilities activation, alarms, signalling, etc. Possibility of complex technological controls with dedicated software modules. It is provided with historical database to record and print all events (alarms, signalling messages, anomalies, accesses, etc.). It is prearranged for management of additional workstations and can be interfaced to most popular front-office PMS applications and air conditioning/heating systems.

## ROOM MANAGEMENT SOFTWARE

<b>SWG25</b>	Room management software from 1 to 25 rooms	Cod. 6100-181025
<b>SWG50</b>	Room management software from 26 to 50 rooms	Cod. 6100-181050
<b>SWG75</b>	Room management software from 51 to 75 rooms	Cod. 6100-181075
<b>SWG100</b>	Room management software from 76 to 100 rooms	Cod. 6100-181100
<b>SWG150</b>	Room management software from 101 to 150 rooms	Cod. 6100-181150
<b>SWG200</b>	Room management software from 151 to 200 rooms	Cod. 6100-181200
<b>SWG250</b>	Room management software from 201 to 250 rooms	Cod. 6100-181250
<b>SWG500</b>	Room management software from 251 to 500 rooms	Cod. 6100-181500
<b>SWG1000</b>	Room management software from 501 to 1000 rooms	Cod. 6100-181999

## SYSTEM OPERATION

MEGA is a distributed logic system used to manage hotel functions. The system uses small peripheral units with logic and memory, installed in different locations (such as rooms, common areas, technical rooms, etc.) and connected to the supervision PC by means of two-wire BUS cable.

Since all parameters are saved in the room control unit, a temporary anomaly of the PC will not cause system malfunctioning.

Accesses, electricity, air-conditioning (with consequent energy saving) will continue on operating correctly.

New cards cannot be enabled and alarms cannot be displayed.

Data is transmitted according to RS 485 half duplex standard using a proprietary protocol developed by ITC srl to optimise transmission time and reduce equipment costs. Data is transmitted over balanced line, with suppression of most electromagnetic interference.

The cable is a UTP CAT. 5 cable.

In special cases, such as outdoor installations, the use of an FTP screened cable with double protection sheath and earthed screen is recommended. The maximum length of the communication bus is one kilometre; an amplified signal splitter (PSA) can be used beyond such a distance for extra 1000 m. The room control unit (CPU) have been designed for installation in room unit with 12 modules (9 for CPU and 3 for transformer with 12Vac, 30VA power) for easy installation with DIN connection and easy maintenance. The CPUs are provided with removable connectors and telephone plugs for easier replacement.

The CPU code is set with a dip-switch for easy replacement in case of failure also by non-expert staff (by simply copying the position of the cursors from the unit to be replaced). When power supply is restored, the new CPU shows the code set in the internal display to check that it is correct. The leds associated with inputs and outputs allow for checking the status (close/open) for easy identification of faulty switches (window, door, frigo bar, etc.) or blocked electrovalves, without using an external device (multimeter).

The communication between CPU and PC can be controlled on the internal display, as well as communication between CPU and chip card or transponder reader.

### All system anomalies are informed in real time to the operator:

- defective temperature sensors,
- truncated bathroom alarm cables,
- and malfunctioning CPUs.

### IMPORTANT

The fact that some relays are piloted in inverted mode (powered relay -->deactivated output, not powered relay

-->activated output) guarantees electricity supply in the room and operation of the air-conditioning system at minimum speed also in case of failure of the CPU or the power supply transformer until the hotel maintenance operator replaces the faulty part.

A PC server can be installed to physically connect the bus and multiple client PCs connected in network to the server PC, with full system operation from each PC.

The 220Vac power supply line must be dedicated and provided with UPS of on-line type to guarantee system operation in case of power cut from 220Vac mains and to filter electromagnetic interference from the line.

Recommendations: an independent transformer should be used for every peripheral unit (CRU) for two reasons:

- a possible transformer fault will affect only one unit/room, and not all the units connected to it,
- possible electromagnetic interference of a specific unit are localised and are not transmitted to the rest of the installation through the power supply.

### System technological upgrade:

Since the microprocessor in the Mega control unit is of flash type (i.e. reprogrammable), all existing installations can be upgraded with the latest firmware version to manage the new functions.

Existing installations can be upgraded with minimal time and cost investment as if they were brand new.

## IMPORTANT NOTICE

- The Mega control unit is mounted in DIN bar and takes 9 modules. It must be powered at 12Vac with 30VA transformer. An independent transformer must be used for each control unit and connected to a dedicated electrical line with on-line UPS.
- **Always disconnect power supply before making electrical connections.**
- Temperature sensors must be installed in dedicated boxes, at about 1.5 m from the floor, in a place protected from sunlight and away from air draughts or heat sources (such as doors, windows, perimeter walls, etc.). Do not install them above the thermostat panel, since it generates heat.
- The connection cables of the input devices (such as temperature sensors, magnetic contacts, buttons, etc.) must not exceed 20 m in length.
- The fan-coil and towel warmer valves can only be of ON/OFF type (electrothermal or motorised open/close valves). It is recommended to use valve controls at 220Vac voltage. The electrothermal model must be of NC type, i.e. with control mounted on the valve and not powered, the water flow must be blocked.
- The radiator valve is alternative to the fan-coil. It is not possible to install both components in the same room installation. It can be of ON/OFF type, modulating motorised or modulating linear, piloted with continuous voltage 0-10V.
- The room telerruptor must be at 220Vac. An additional transformer must be installed for components with different voltage.
- Use a good-quality crimping tool to crimp PLUG connectors and check them with cable tester. The cable length must not exceed 15 metres. In case of multiple readers connected in cascade the length of each section must be added, without exceeding the said limit.
- We recommend installing a 1.6A delayed fuse between relay output contact and load to protect the board in case of actuator failure.
- Auxiliary relays must be used to close electrical shutters, possibly in combination with suitably Dimensionsd protection fuses. The shutter motor must not be connected directly to the relay of the Mega control unit.
- **We recommend keeping signal lines (data bus, inputs, etc.) separate from power lines.**
- The minimum requirements of the PC used to control the installation are as follows:
  - Pentium IV 2.8GHz CPU
  - 160 GB hard disk
  - 1 GB Ram
  - S-VGA colour monitor
  - 1 serial port (second port recommended as spare),
  - 2 USB ports
  - Fast Ethernet 10/100 Mbps network board
  - Mouse and keyboard
  - Audio board and speakers
  - Operating system: Windows XP professional or Windows 7 32bit.
- **For correct operation the PC must be always on and must be dedicated to the I.T.C. technological management system.**
- The control software works at 800x600 pixel resolution.

### MULTI-WIRE ROOM DIAGRAM

## MEGA-M GENERAL FEATURES

The Mega-M Systems is used for the centralised management of hotel technological functions to improve client comfort, increase safety and reduce energy costs.

The PC-based supervision central station communicates over a bus with the control units installed in the rooms, which are provided with independent intelligence to manage the controlled processes also without communication with the central station.

Easy-to-use intuitive software controls the following functions:

- **Access Control:**  
The access to rooms and/or common areas by guests and staff is permitted by means of chip card or transponder readers, with access recording in data base.
- **Safety:**  
Bathroom, flood, technological and intrusion alarms can be detected, also using volumetric motion sensors. All events are recorded.
- **Room status:**  
The system informs in real time if the room is free, in use, in need of cleaning or with mini-bar to check.
- **Energy saving:**  
The activation of energy supply in the rooms is related to the guest's presence.
- **Technological controls:**  
The system can detect statuses and alarms from the heating station or other technological rooms.  
It can also activate lights, control pumps and actuators.
- **Diagnostics:**  
System anomalies are promptly detected and signalled to operators.
- **Administration:**  
The system can be interfaced with the most common software applications for hotel administrations (PMS).

## ROOM CONTROL UNIT

UGC-M

Cod. 6200-101010

The UGC-M control unit is housed in a 6-module box for DIN rail and is provided with the following inputs:

- RJ45 8/8 PLUG connector for chip card or proximity card reader,
- RJ12 6/6 PLUG connector for badge or jack room activator;
- bathroom cord, flood sensor,
- digital input for "do not disturb" button,
- 3 programmable digital inputs for:
  - window switch (NC or NO),
  - courtesy light button (NO),
  - door opening button from bed headboard (NO),
  - switch,
  - timed button (NO),
  - infrared or dual-technology intrusion sensor (NC or NO),
  - reset button to reset one or more of the following signalings: bathroom or flood alarm, room to clean, mini-bar to check.

It is provided with 3 relay outputs with voltage-free contacts for 230Vac – 4(2) A loads to control:

- courtesy light switching-on or shutter opening,
- room electricity contactor,
- programmable AUX output for activation of one of the following devices:
  - electric shutter closing,
  - water valve closing in case of flood,
  - ON/OFF controls or with software clock,
  - timed activation with button.

A 12Vdc, max 1.2A voltage output for door lock activation and a SCR output for power supply of "do not disturb" luminous button are also available. All connectors are removable with 5.08 pitch. Data is transmitted over 2-wire UTP CAT.5 bus cable, RS 485 standard, with flashing led to check the correct communication between PC and units. Re-programmable microcontroller of flash type. 12Vac, 30VA power supply. Dimensions: 106x100x60 mm. Weight: 0.30 kg.

## CHIP CARD READER WITH SYNOPTIC

LCC-M

Cod. 6200-111000

It provides access to the room in different mode for guests, managers, staff, maintenance operators, etc. It is provided with illuminated insertion slot for chip card with ISO 7816 format and led for card validity and room status (free/in use) indication. It is also provided with "do not disturb" luminous signal that can be activated by the guest in the room. It is housed in 3-module box and connected to the UGC-M control unit with 8-wire cable terminated with RJ45 PLUG. Weight: 0.10 Kg. Depth 53mm.

## PROXIMITY CARD READER WITH SYNOPTIC

LTC-M

Cod. 6200-113000

It provides access to the room with proximity cards ISO 7816 format in different mode for guests, managers, staff, maintenance operators, etc. Max. reading distance 5 cm. It is provided with LED for card validity and room status (free/ in use) indication. It is also provided with "do not disturb" luminous signal that can be activated by the guest in the room. It is housed in 3-module box and connected to the UGC-M control unit with 8-wire cable terminated with RJ45 PLUG. Weight: 0.10 Kg. Depth 53mm.

## INTELLIGENT ROOM ACTIVATOR FOR CHIP CARD

AIC-M

Cod. 6200-123000

It detects the presence of guests or staff in the room by reading the inserted chip and activates room services only if the card is enabled. It is provided with illuminated slot for ISO 7816 cards and two flashing leds for easier insertion. It is housed in 3-module box and connected to the UGC-M control unit by means of 6-wire cable terminated with RJ12 PLUG. Weight: 0.10 Kg. Depth 44mm.

**SWG-M1000** MEGA-M room management software from 501 to 1000 rooms Cod. 6200-181999

### IMPORTANT NOTICE

- The UGC-M control unit is mounted in DIN rail and takes 6 modules. It must be powered at 12Vac with 30VA transformer, which takes 3 additional modules. An independent transformer must be used for each control unit and must be connected to dedicated electrical line with on-line UPS.
- Always disconnect power supply before making electrical connections.
- Connection cables of input devices (i.e. magnetic contacts, buttons, etc.) must not exceed 20 metres in length.
- Room telerruptor must be at 230Vac. Additional transformers must be installed for components with different voltage.
- Use a good-quality crimping tool to crimp RJ45 and RJ12 PLUG connectors and check them with cable tester. The length of the cable must not exceed 15 m for art. AS, AJ and AIC-M; it must not exceed 4 m for items LCC-M and LTC-M.
- We recommend installing a 1.6A delayed fuse between relay output contact and load to protect the board in case of actuator failure.
- Auxiliary relays must be used to close electrical shutters, possibly in combination with suitably dimensioned protection fuses. The shutter motor must not be connected directly to the UGC-M relay.
- We recommend keeping signal lines (data BUS, inputs, etc.) separate from power lines.
- The minimum requirements of the PC used to control the installation are as follows:
  - . Pentium IV 2.8GHz CPU
  - . 160 GB hard disk,
  - . 1 GB Ram,
  - . S-VGA colour monitor
  - . 1 serial port (second port recommended as spare),
  - . 2 USB ports,
  - . Fast Ethernet 10/100 Mbps network board
  - . Mouse and keyboard,
  - . Audio board and speakers,
  - . Operating system: Windows XP professional or Windows 7 32bit.
- For correct operation the PC must be always on and must be dedicated to the MEGA-M technological management system.
- The control software works at 800x600 pixel resolution.

## MEGA-RSA GENERAL FEATURES

### Type

Management and control system of main functions in nursing homes, health facilities and hospitals of any size.

The user-friendly software allows for managing bed headboard and bathroom alarms, bi-directional handsfree communication between staff and patients, air conditioning/heating, access control, as well as the main technological functions of the structure.

It can be interfaced with PBX telephone systems to send alarm signalling messages to cordless telephones.

### Features

The system is designed to control calls from patient rooms and bathroom alarms. The integrated audio system provides full-duplex handsfree communication with the patients. The control station includes a PC, a desktop microphone unit and a speaker. Local reset function, luminous door repetition of alarm/call events, with event recording and printing. The use of dedicated technological control units makes it possible to switch on luminous guides in corridors to indicate the origin of alarms/calls.

### System components

- One dedicated computer (not supplied by I.T.C.) with Windows XP professional or Windows 7 32bit operating system,
- RS232/RS485 signal converter,
- Signal splitters,
- One MEGA-H control unit for each room (or one control unit every 2 rooms),
- Call buttons and pull cords (not supplied by I.T.C.),
- Sockets and coded jacks for local reset,
- One high-sensitivity microphone for each room (3-4 m range) for 3-module flush mounting box,
- One recessed speaker in each room,
- One temperature sensor in each room,
- One thermostat panel in each room,
- One desktop microphone unit and one speaker for control station,
- Power supply units for microphones and speakers,
- One UGT control unit for every 8 common bathrooms, with possibility of alarm luminous repetition on door and reset from PC only. Optional terminal for connection of 16 bathroom cords for every control unit, with alarm identification from PC only.
- One UGT control unit every 8 luminous guides,
- Lamps, gems, transformers, etc. to complete the installation (not supplied by I.T.C.).
- PBX telephone system (not supplied by I.T.C.),
- Fixed telephones (not supplied by I.T.C.),
- Cordless telephones (not supplied by I.T.C.).

### Functions

- Bathroom and bed headboard alarm detection, with switch on of door light and reassuring light,
- Local reset (with coded jack) or from operator station.
- Full-duplex handsfree communication with patient, with activation from operator station,
- Detection of alarms from common bathrooms,
- Recording and printing of alarm and reset events,
- Constant control of system anomalies, with anomaly recording and printing,
- Luminous guides in corridors,
- Possibility to connect a unit for alarm/call message repetition.

In case of installations in nursing homes, in addition to the PC the control station is also equipped with a station for bidirectional communication with patient. This station includes one microphone, one speaker and one amplified power supply. In case of bed headboard call, the door light signal switches on and the visual/sound signal is activated on the PC, with identification of calling room. The nurse can activate the bidirectional communication with the patient and then reset the alarm directly from the PC. If direct intervention is necessary in the room, the alarm can be reset by inserting a coded jack in the socket. In case of call from other rooms (bathrooms, changing rooms, etc.) the operation is the same, except for handsfree communication. The system can also manage the switch-on of luminous arrows installed along the corridors that guide the staff to the room where the call is originated.

## ROOM CONTROL UNIT

UGC-H

Cod. 6300-101010

The UGC-H control unit is housed in 9-module box for DIN rail. It is provided with 8 analog and 4 digital inputs for connection of following devices:

- "STI" temperature sensors,
- NO or NC type alarm/anomaly contacts,
- buttons,
- bathroom pull cords for help call.

It is also provided with socket for PTF/PTR panel (max. 1) and 8 relay outputs with voltage free contacts for loads at 230Vac - 4(2)A.

Data transmission over 2-wire UTP CAT.5 bus cable in RS 485 standard.

Reprogrammable microcontroller of flash type, 12Vac, 15VA power supply.

Dimensions: 160x100x60 mm.

Weight: 0.50 kg.

## SOCKET FOR LOCAL RESET

PRL

Cod. 6300-141000

Socket for local alarm reset by means of coded jack for identification of operator with display, recording, storing and printing of events.  
Weight: 0.03 kg. Depth 46mm.

## TEMPERATURE SENSOR

STI

Cod. 6100-131000

It measures the temperature of the room where it is installed. It is composed of an NTC sensor and is installed in a standard blank insert. It must be installed at 150/170 cm from the ground, in specific box away from heat sources or air draughts. Weight: 0.03 kg. Depth 35mm.

## FAN-COIL THERMOSTAT PANEL

PTF

Cod. 6100-133000

It allows the guest to change temperature, speed, automatic or manual operation and switch off air conditioning. The display shows time, set and measured temperature and speed. The light sensor optimises contrast and luminous symbols give information on operation status. It is housed in 3-module box and connected to the control unit by means of 6-wire cable terminated with RJ12 PLUG. Weight: 0.10 kg. Depth 45mm.

## AMPLIFIED POWER SUPPLY

A20/5

Cod. 3200-211010

The preamplification circuit is provided with one Aux input for connection of an external sound source (CD player, etc.), and one input to process the signal from max. 3 desktop microphone units BMCP/A for priority call on sound source. It is also provided with adjustment of input level of the Aux and Mic signals and with adjustment of output signal level, suitable for connection with lines of "SM" series amplified speakers. It can power max. n. 20x10W or n. 5x20W powered speakers. For installations with a higher number of speakers additional A20/5 power supplies must be used. Made of painted metal, for wall-mounted or desktop installation. Dim.: 230x60x210 mm. Weight: 3.6 kg.

### TECHNICAL SPECIFICATIONS

Input impedance Aux	100K $\Omega$
Input sensitivity Aux	-12dB
Input impedance Mic.	15K $\Omega$
Input sensitivity	10 $\Omega$
Max output level	+8dB - 4Vpp
Power supply	220Vac
Power absorption	120VA
Distributed voltages	18Vdc/4A
	12Vdc/1A - 9Vdc/0,5A
Dimensions	230x60x210mm
Colour	black
Weight	3,6Kg

## ADDITIONAL POWER SUPPLY

AS20/5

Cod. 3100-131010

In amplified systems it enables power supply for n. 20x10W or n. 5x20W powered speakers of the 'AUDIO RSA' series. Produced in painted metal, it can be wall mounted or supported on a surface.

### TECHNICAL SPECIFICATIONS

Power supply	220Vac
Power absorption	120VA
Output	18Vdc/4A
Dimensions	230x60x210mm
Colour	black
Weight	3,4Kg

## PREAMPLIFIED DESKTOP MICROPHONE UNIT

BMCP/A

Cod. 1800-221010

Unit with gooseneck microphone, cardioid electret with luminous ring, suitable for voice announcements in combination with A20/5 or AD20/5 power supply. It can be also connected to announcement generator GSV. Provided with one stable and one unstable button to activate microphone and priority contact for attenuation of sound source connected to the same power supply, and activate the circuit to generate the dual-tone signal. Two leds indicate button activation. It is powered directly from the power supply to which it is connected. Aluminium extruded body, ABS sides with feet. Complete with 5m connection cable. Grey/black colour.

### TECHNICAL SPECIFICATIONS

Output impedance	10K $\Omega$
Output level	3Vpp
Frequency response	100÷15000Hz
Power supply	12Vdc
Absorption	50mA
Microphone type	electret - 500mm rod
Dimensions	206x550x130mm
Colour	black/grey
Weight	1,4Kg

## RECESSED MICROPHONE

MI503

Cod. 3200-231000

High-sensitivity electret cardioid microphone that guarantees excellent voice quality in situations where the speaker is distant from the microphone. To combine with A20/5 amplified power supply. Microphone capsule and preamplifier circuit mounted on vetronite support with adhesive lexan, suitable for installation in 3-module box that is taken completely. Available in the series specified in the table. Weight: 0.09 Kg. Depth 45mm.

## 10W CEILING-MOUNT SPEAKER

DC20/H

Cod. 3400-120101

Ceiling-mount speaker for excellent playback quality of voice announcements and background music. Body and grille made of painted metal, provided with spring clips for easy installation in false ceiling. Complete with amplifier module with trimmer for better adjustment of sound level. White colour.

### Profile

### TECHNICAL SPECIFICATIONS

Type	ceiling mount
Input impedance Aux	10K $\Omega$
Input sensitivity	400mV
RMS power	10W
Power supply	18Vdc
Absorption	200mA
Frequency response	110 ÷ 15000Hz
S.P.L. 1W@1m	90 $\pm$ 3dB
Speaker type	5" full range
Speaker impedance	8 $\Omega$
Dimensions	$\varnothing$ 200mm x 50mm
Recessed hole dimensions	$\varnothing$ 170mm
Material	metallo
Colour	white
Weight	0,7Kg

## 10W CEILING/WALL MOUNT SPEAKER

DCP2017/H

Cod. 6400-241101

Elegant speaker characterised by excellent quality of voice announcements and background music. ABS self-extinguishing body with painted metal grille, provided with rotary hooks for easy and quick installation in false ceilings. Alternatively, it can be installed on the wall with GEWISS PT5 recessed box (not supplied). Complete with amplifier module with trimmer for better adjustment of sound level. White, grey, black colour.

### Profile

### TECHNICAL SPECIFICATIONS

Type	ceiling/wall mount
Input impedance Aux	10K $\Omega$
Input sensitivity	400mV
RMS power	10W
Power supply	18Vdc
Absorption	200mA
Frequency response	120 ÷ 18000Hz
S.P.L. 1W@1m	93dB
Speaker type	4" Bi-cone
Speaker impedance	4 $\Omega$
Dimensions	195x166x55mm
Recessed hole dimensions	155x125mm
Material	ABS/steel
Colour	white, black, grey
Weight	1,0Kg

## 10W WALL-MOUNT SPEAKER

DP2512/H

Cod. 6400-251101

Wall-fitted speaker for excellent playback quality of voice announcements and background music. Polycarbonate self-extinguishing body in class V2. Complete with amplifier module with trimmer for better adjustment of sound level. White, grey, black colour.

### Profile

### TECHNICAL SPECIFICATIONS

Type	wall mount
Input impedance Aux	10K $\Omega$
Input sensitivity	400mV
RMS power	10W
Power supply	18Vdc
Absorption	200mA
Frequency response	120 ÷ 18000Hz
S.P.L. 1W@1m	93dB
Speaker type	4" Bi-cone
Speaker impedance	4 $\Omega$
Dimensions	250x120x73mm
Sporgenza massima	73mm
Material	ABS
Colour	white, black, grey
Weight	1Kg

## 10W AMPLIFIER CIRCUIT WITH MUSIC/VOICE RELAY

### CA10MP

Cod. 3400-013010

### TECHNICAL SPECIFICATIONS

Input impedance	10K $\Omega$
Input sensitivity	400mV
Input sensitivity	4 ÷ 8 $\Omega$
Frequency response	50 ÷ 20000Hz
Power supply	18Vdc
Absorption	200mA

This circuit is necessary to adapt 4/8 Ohm speakers to amplified installations with A20/5 power supply. Complete with trimmer for better adjustment of sound level. It is provided with one dedicated input for volume adjustment RVC or RVIC. It is also provided with one dedicated audio input for room calls with MEGA-RSA system, in combination with input for 18÷24Vdc activation voltage. It is housed in branching box or fixed on the speaker body.

## SUPERVISION AND CONTROL SOFTWARE

SWB

Cod. 6600-300010

Extremely easy to use, with modern user-friendly graphics, it allows for complete management of rooms and common areas in terms of alarms, signalling messages, reset, temperature, full-duplex handsfree conversation and technological controls. It is provided with historical database to record and print all events (alarms, signalling messages, anomalies, accesses, etc.). It is prearranged for management of additional workstations and can be interfaced with PBX telephone system to send alarm signals to cordless telephone and page staff.

## MEGA-RSA ROOM MANAGEMENT SOFTWARE

<b>SWG-H25</b>	MEGA-RSA room management software from 1 to 25 rooms	Cod. 6300-181025
<b>SWG-H50</b>	MEGA-RSA room management software from 26 to 50 rooms	Cod. 6300-181050
<b>SWG-H75</b>	MEGA-RSA room management software from 51 to 75 rooms	Cod. 6300-181075
<b>SWG-H100</b>	MEGA-RSA room management software from 76 to 100 rooms	Cod. 6300-181100
<b>SWG-H150</b>	MEGA-RSA room management software from 101 to 150 rooms	Cod. 6300-181150
<b>SWG-H200</b>	MEGA-RSA room management software from 151 to 200 rooms	Cod. 6300-181200
<b>SWG-H250</b>	MEGA-RSA room management software from 201 to 250 rooms	Cod. 6300-181250
<b>SWG-H500</b>	MEGA-RSA room management software from 251 to 500 rooms	Cod. 6300-181500
<b>SWG-H1000</b>	MEGA-RSA room management software from 501 to 1000 rooms	Cod. 6300-181999

## SOFTWARE INTERFACE FOR CORDLESS TELEPHONES

SW/C

Software interface for cordless telephones

Cod. 6300-182000

## IMPORTANT NOTICE

- The UGC-H control unit is mounted in DIN rail and takes 9 modules. It must be powered at 12Vac with 15VA transformer. An independent transformer must be used for each control unit, connected to dedicated electrical line with on-line UPS.
- **Always disconnect power supply before making electrical connections.**
- The temperature sensors must be installed in dedicated boxes at approx. 1.5 m from the floor, in a place protected from sunlight and away from air draughts or heat sources (i.e. doors, windows, perimeter walls, etc.). Do not install it above the thermostat panel because it generates heat.
- The connection cables of the input devices (such as temperature sensors, magnetic contacts, buttons, jack sockets, etc.) must not exceed 20 m in length.
- The radiator or fan-coil valves must be of ON/OFF type. Valve controls must be provided with 220Vac voltage. The electrothermal model must be of NC type, i.e. with control mounted on the valve and not powered, the water flow must be blocked.
- Use a good-quality crimping tool to crimp PLUG connectors and check them with suitable cable tester. The cable length must not exceed 15 metres.
- It is recommended to install a 1.6A delayed fuse between the relay output contact and the load to protect the control unit.
- **We recommend keeping signal lines (data BUS, inputs, etc.) separate from power lines.**
- The minimum requirements of the PC used to control the installation are as follows:
  - Pentium IV 2.8GHz CPU
  - 160 GB hard disk
  - 1 GB Ram
  - S-VGA colour monitor
  - 1 serial port (second port recommended as spare)
  - 2 USB ports
  - Fast Ethernet 10/100Mbps network board
  - mouse and keyboard
  - audio board and speakers
  - Windows XP professional or Windows 7 32bit
- **For correct operation the PC must be always on and must be dedicated to MEGA-RSA system.**
- The control software works at 800x600 pixel resolution.

## CABLE CRIMPING DIAGRAM

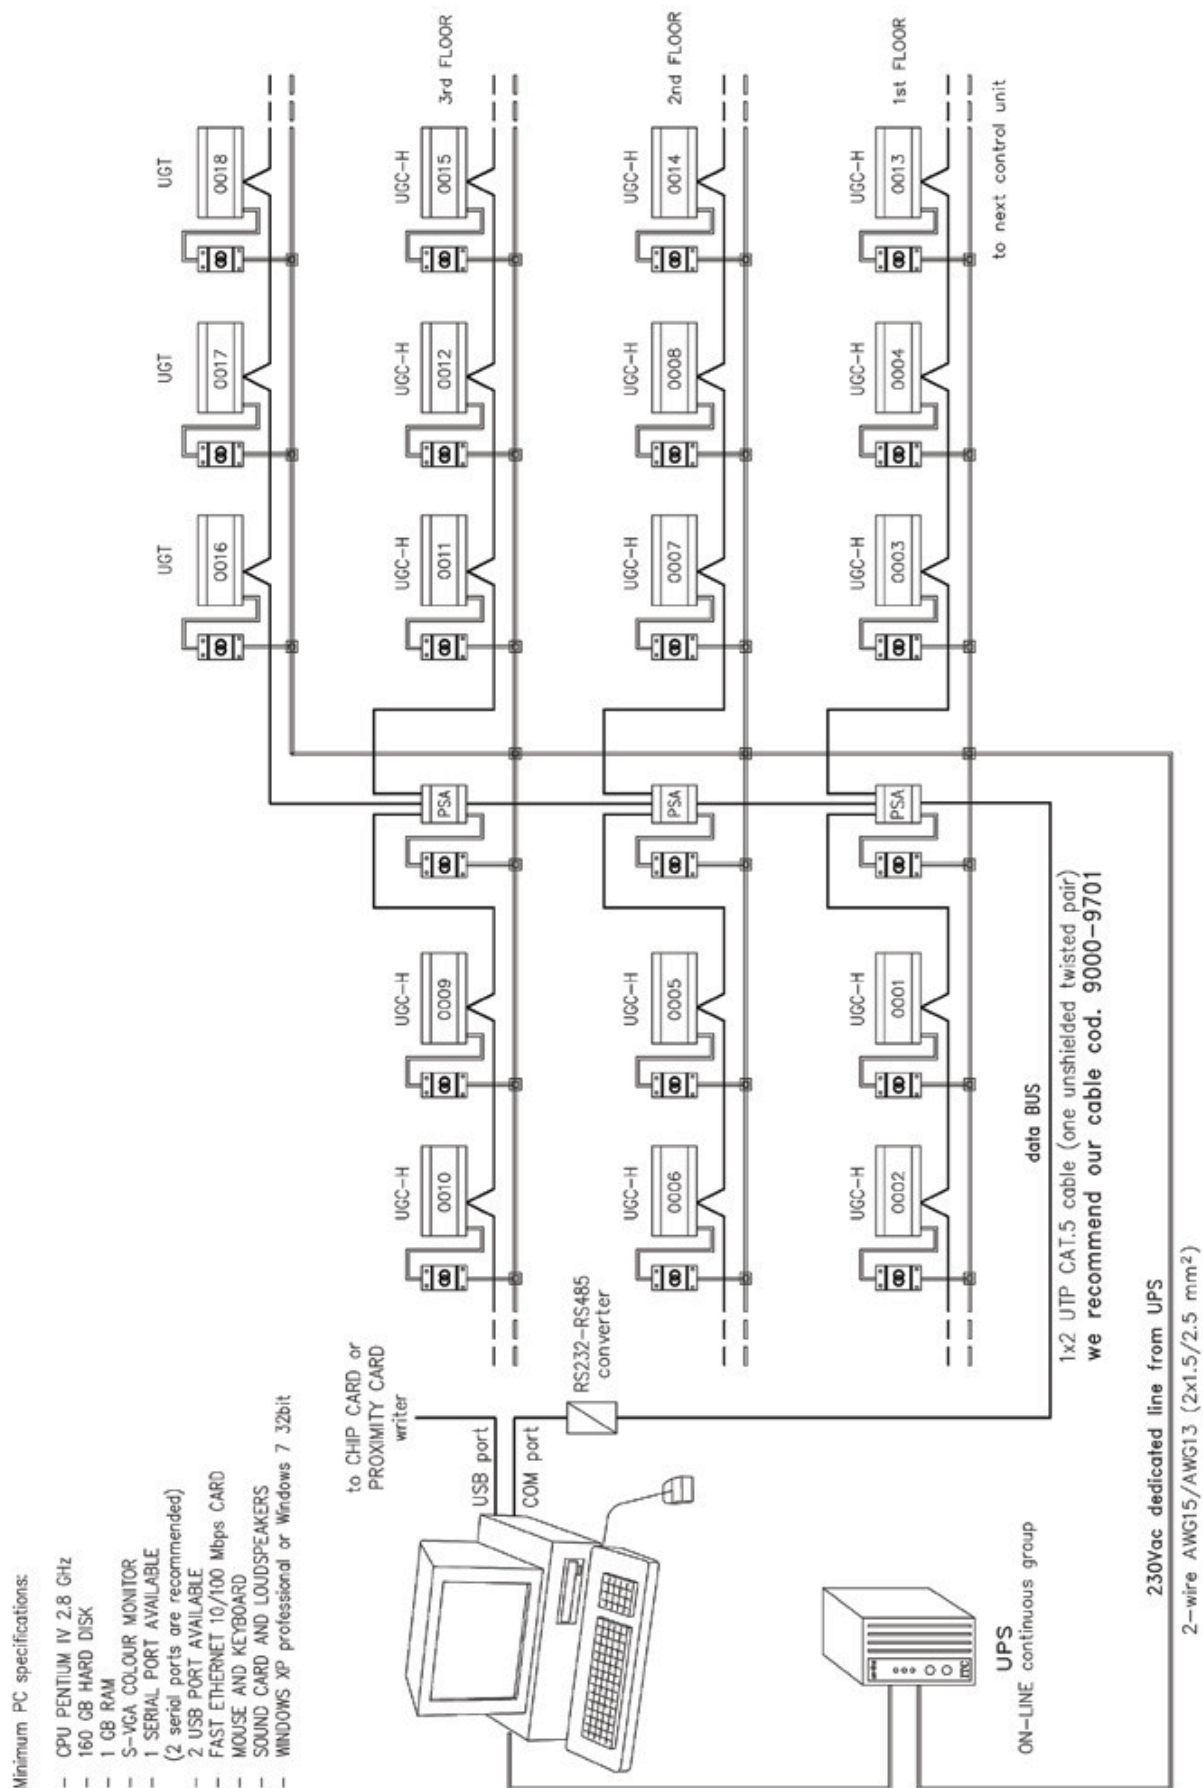

## CABLE HEADINGS FOR RJ12 CONNECTORS OF MEGA-RSA SYSTEM

**WARNING!**

- ONLY USE CABLES DESCRIBED IN DIAGRAM. IF IN DOUBT CONTACT ITC TECHNICAL SUPPORT;
- ONLY USE TOP QUALITY RJ12 6/6 CONNECTORS;
- USE TOP QUALITY PLIERS FOR CRIMPING. METAL ONES ARE PREFERRED;
- CHECK CABLES USING A SPECIFIC TESTER;
- COLOURS DESCRIBED IN DIAGRAM ARE INDICATIVE.

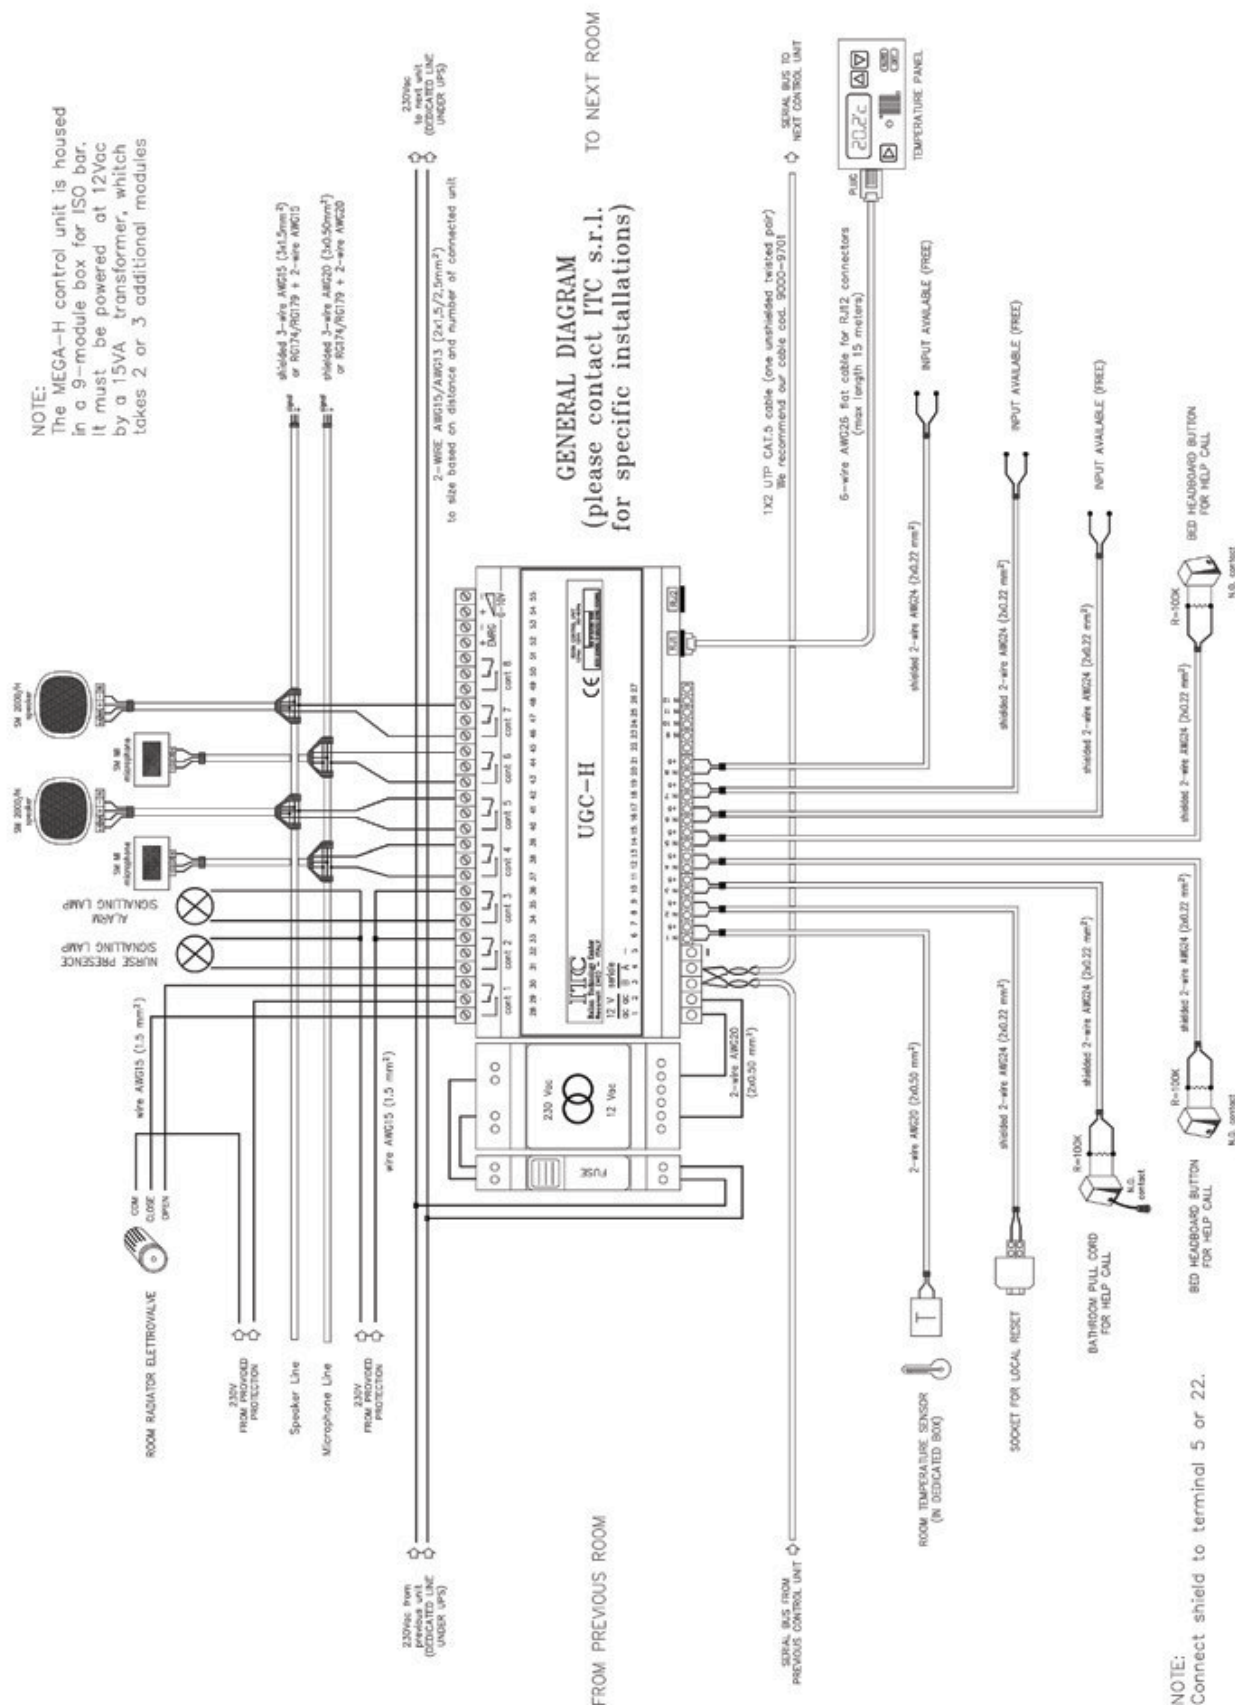

### BUS AND POWER SUPPLY CONNECTION DIAGRAM

### MULTI-WIRE ROOM DIAGRAM

**NOTE:**  
The MEGA-H control unit is housed in a 9-module box for ISO bar. It must be powered at 12Vac by a 15VA transformer, which takes 2 or 3 additional modules.

NOTE:  
Connect shield to terminal 5 or 22.

## TECHNOLOGICAL CONTROL UNIT

UGT

Cod. 6500-101010

The UGT technological control unit is housed in 9-module box for DIN rail. Provided with 8 analog and 4 digital inputs for connection of following devices:

- "STI" temperature sensors,
- NO or NC type alarm/anomaly contacts,
- switches,
- buttons,
- bathroom pull cords for help call,
- flood sensors,
- counters.

It is also provided with inputs for "PTF/PTR" panel (max. 1) and chip card or proximity card readers for common areas (max. 4).

It is provided with 8 relay outputs with voltage-free contacts for 230Vac - 4(2)A loads and one output with 0-10Vdc continuous voltage for control of linear modulating electrovalves.

Data is transmitted over 2-wire UTP CAT.5 bus cable, RS 485 standard,

Re-programmable microcontroller of flash type. 12Vac, 15VA power supply.

Dimensions: 160x100x60 mm. Weight: 0.50 kg.

## CHIP CARD READER FOR COMMON AREAS

LCZ

Cod. 6500-115000

It provides access to common areas in different mode for guests, visitors, manager, staff, maintenance operators, etc. It is provided with illuminated insertion slot for chip card with ISO 7816 format, 2 leds for card validity and one voltage free contact for door opening with 24V, 4(2)A relay. It is housed in 3-module box and connected to the technological control unit UGT with 6-wire cable terminated with RJ12 PLUG. Weight: 0.1 kg. Depht: 50 mm.

## PROXIMITY CARD READER FOR COMMON AREAS

LTZ

Cod. 6500-117000

It provides access to common areas by proximity cards with ISO 7816 format in different mode for guests, visitors, manager, staff, maintenance operators, etc. Max. reading distance 5 cm. It is provided with 2 leds for card validity and one voltage free contact for door opening, with 24V, 4(2)A relay. It is housed in 3-module box and connected to the technological control unit UGT with 6-wire cable terminated with RJ12 PLUG. Weight: 0.1 kg. Depht: 53 mm.

## TEMPERATURE SENSOR

STI

Cod. 6100-131000

It measures the temperature of the room where it is installed. It is composed of an NTC sensor and is installed in a standard blank insert. It must be installed at 150/170 cm from the ground, in specific box away from heat sources or air draughts. Weight: 0.03 kg. Depth: 35mm.

## FAN-COIL THERMOSTAT PANEL

PTF

Cod. 6100-133000

It allows the guest to change temperature, speed, automatic or manual operation and switch off air conditioning. The display shows time, set and measured temperature values and speed. The light sensor optimises contrast and luminous symbols provide information on operation status. It is housed in 3-module box and connected to the control unit by means of 6-wire cable terminated with RJ12 PLUG. Weight: 0.1 kg. Depth: 45mm.

## SUPERVISION AND CONTROL SOFTWARE

SWB

Cod. 6600-300010

Extremely simple to use, with modern attractive graphics, enables total management of shared spaces for access, activation of electrical appliances, alarms, signals, etc. Complex technological controls available through dedicated software modules. Features historical archive for management and printing of all events (alarms, signals, anomalies, access, etc.). Can handle additional workstations and can be interfaced with the most popular air conditioning/heating systems.

## TECHNOLOGICAL CONTROL UNITS MANAGEMENT SOFTWARE

SWG-T5	Technological software from 1 to 5 UGT units	Cod. 6500-183005
SWG-T10	Technological software from 6 to 10 UGT units	Cod. 6500-183010
SWG-T15	Technological software from 11 to 15 UGT units	Cod. 6500-183015
SWG-T20	Technological software from 16 to 20 UGT units	Cod. 6500-183020
SWG-T25	Technological software from 21 to 25 UGT units	Cod. 6500-183025
SWG-T35	Technological software from 26 to 35 UGT units	Cod. 6500-183035
SWG-T50	Technological software from 36 to 50 UGT units	Cod. 6500-183050
SWG-T75	Technological software from 51 to 75 UGT units	Cod. 6500-183075
SWG-T100	Technological software from 76 to 100 UGT units	Cod. 6500-183100

## IMPORTANT NOTICE

- The UGT control unit is mounted in DIN rail and takes 9 modules. It must be powered at 12Vac with 15VA transformer. An independent transformer must be used for each control unit, connected to dedicated electrical line with on-line UPS.
- **Always disconnect power supply before making electrical connections.**
- The temperature sensors must be installed in dedicated boxes at approx. 1.5 m from the floor, in a place protected from sunlight and away from air draughts or heat sources (i.e. doors, windows, perimeter walls, etc.). Do not install it above the thermostat panel because it generates heat.
- The connection cables of the input devices (such as temperature sensors, magnetic contacts, buttons, jack sockets, etc.) must not exceed 20 m in length.
- The radiator or fan-coil valves must be of ON/OFF type. Valve controls must be provided with 220Vac voltage. The electrothermal model must be of NC type, i.e. with control mounted on the valve and not powered, the water flow must be blocked.
- Use a good-quality crimping tool to crimp PLUG connectors and check them with suitable cable tester. The cable length must not exceed 15 metres.
- It is recommended to install a 1.6A delayed fuse between the relay output contact and the load to protect the control unit.
- **We recommend keeping signal lines (data BUS, inputs, etc.) separate from power lines.**
- The minimum requirements of the PC used to control the installation are as follows:
  - Pentium IV 2.8GHz CPU
  - 160 GB hard disk
  - 1 GB Ram
  - S-VGA colour monitor
  - 1 serial port (second port recommended as spare)
  - 2 USB ports
  - Fast Ethernet 10/100Mbps network board
  - mouse and keyboard
  - audio board and speakers
  - Windows XP professional or Windows 7 32bit.
- **For correct operation the PC must be always on and must be dedicated to the MEGA-TECH system.**
- The control software works at 800x600 pixel resolution.

## MULTI-WIRE DIAGRAM

NOTE:  
The UGT unit is housed in a 9 modules  
box for DIN bar.  
Fed by a 12Vdc, 15/30VA power supply.

## CHIP CARD WRITER

CC

Cod. 6600-201010

Chip card reader/writer in desktop version, complete with connection cable to PC via USB port. Dimensions (lxhxd): 72x28x84 mm. Weight 0.1 kg.

## PROXIMITY CARD WRITER

CT

Cod. 6600-203010

Proximity card reader/writer in desktop version, complete with connection cable to PC via USB port. Dimensions (lxhxd): 51x21x96 mm. Weight 0.1 kg.

## AMPLIFIED SIGNAL SPLITTER

PSA

Cod. 6600-211010

It amplifies incoming signal and splits it over three different outputs. It is housed in 3-module box for DIN rail. 12Vac, 15VA power supply. Dimensions (lxhxd): 54x96x58 mm. Weight 0.1 kg.

## SIGNAL CONVERTER

CS

Cod. 6600-221010

It converts the signal from RS232 to RS485 half duplex standard. 220Vac, 5VA power supply. Dimensions (lxhxp): 122x62x65. Weight: 0.5 kg.

## ADAPTER KIT FOR USB-COM PORT

C-USB

Cod. 6600-223010

Converter from USB to serial port.

## CHIP CARD

SC

Cod. 6600-231010

2K chip card with protected memory, ISO 7816 standard, credit card format. Single-face standard printing with insertion direction. Dimensions (l x h x d): 54x1x85. Weight: 0.02 kg.

## TRANSPONDER TAG

ST

Cod. 6600-233010

125 KHz proximity card, credit card format. Single-face standard printing. Dimensions (l x h x d): 54x1x85. Weight: 0.02 kg.

## ROOM ACTIVATOR

AC

Cod. 6600-241010

It detects the guest presence in the room by closing of a contact (i.e.: suite control). Dimensions: 64x89x40mm. Weight 0,1Kg.

## GUEST JACK

JC

Cod. 6600-251010

When inserted in the "AJ" room activator, it allows the system to detect the presence of guests and activate room services. Weight: 0.03 kg.

## STAFF JACK

JP

Cod. 6600-253010

When inserted in the "AJ" room activator, it allows the system to detect the presence of the staff and activate specific services. It can manage max. 30 different names. Weight: 0.03 kg.

## UTP CAT.5 1x2 BUS CABLE

CUTP

Cod. 6600-012300

1-pair twisted cable, 1x2 UTP CAT.5, for data bus.

## 100%ED ELECTRIC DOOR LOCK

IE100

Cod. 6600-261010

"Current launch" operation with self-closing, adjustable latch locking lug, completely symmetrical and reversible. 12 Vdc power supply, 250 mA absorption, 100%ED "fail secure" coil.

## ELECTRIC DOOR LOCK

IE

Cod. 6600-263010

"Current launch" operation with self-closing, adjustable latch locking lug, completely symmetrical and reversible. 12 Vac/dc power supply, 480 mA absorption.

## FRONTAL PLATE FOR ELECTRIC DOOR LOCK

MRIE

Cod. 6600-260013

Reversible model made of stainless steel.
